AI Art Ambiguity

What was the original picture?

Overview

- ★ # of Participants: **2-40**
- ★ Where to Play: **Indoors**
- ★ Age of Participants: **Elementary/Middle / High School**
- ★ Approximate Time to Play: **15-30 minutes**
- ★ Materials: **AI Art Pictures (linked below), a way to display your screen**

Summary

- ★ Players guess photos that have been changed thousands of times by an AI art bot.
- ★ Photos start out looking nothing like the original.
- ★ As the leader advances through the images, each one gets closer to the original.
- ★ Players shout out guesses, the first one correct wins a point for their team.
- ★ Visit ActuallyFun.com to purchase this game.

How to Play

We gave a picture to an AI art bot and told it to make it just a little bit different. Then we took that picture, gave it back to the bot, and told it to make it a little different again. And we did this until the picture had gone through 5,000 iterations and looked nothing like the original. All this so that you could play an incredibly unique game with your youth group.

Divide your group into two teams and make sure they can see the TV/monitor. The leader will be showing the group all of the iterations of the picture, but in *reverse*, as in they start with the picture that has been changed 5,000 times and keep progressing until it slowly looks more and more like the original. For simplicity we only used 1 in every 100 pictures that the bot gave us so that there's a noticeable difference between each picture.

The goal is to be the first person to correctly identify the original picture. For example, pictures start off looking nothing like pizza/yoda/a flamingo/a firetruck/an owl/ a scooter, but skip forward and now it does a little bit. Advance forward a few more images and now most people would be able to guess correctly, and finally you get to the original picture. Whoever guesses the original picture first earns a point for their team, and the team with the most points at the end wins.

If you're wondering how to play this game with your group, you've got two options. Your first option is to go through the process of creating the images yourself. We used the website dreamstudio.ai to make ours, but I'll warn you it takes a really long time. That's why after half a year of working on this we're offering 20 of these pictures for purchase on our website. Rather than spending hours creating your own, the zip file you're able to download from us not only has the raw pictures if you want to flip through them at your own pace, it also comes with a video that you can just play and pause between rounds. There is even a cheat sheet that the leader can use to know what the final picture will be, and then all you have to do is listen for the correct answer. This game couldn't be easier for you to lead, and I guarantee you none of your members have ever played anything like this before. Download the digital file on our website ActuallyFun.com today!
